

Global Sources •••

Searching the planet for maximum value.

••• Local Engineers

Finding the features that make products last.

McGUIRE
Bearing Company

SUPERIOR PRODUCTS **LARGE INVENTORIES** TECHNICAL SUPPORT

The number one alternative
to the big East Coast chain stores.

McGUIRE
Bearing Company

Our first priority in global sourcing is *quality*. Our engineers look for features that will improve performance and increase life. This saves you money in three ways: product, maintenance and downtime.

Longer lead times from overseas sources necessitate larger inventories. Our *large local inventories* reduce your chances of paying expedited shipping when you need something in a hurry.

Our engineers offer design assistance and root cause failure analysis, among other things. We also provide predictive monitoring, balancing and alignment services.
