Serving your sprocket needs like no one else can.

Your specified plate
+ Your specified hub
+ Your specified bushing or bore

= The sprocket you need *when* you need it.

Serving your sprocket needs like no one else can.

McGUIRE Bearing Company
Doing It Differently.

It’s not just that we carry a huge inventory. We do! It’s the unique way we do it. We stock not only finished sprockets, but also components. This makes our inventory more flexible and makes you more likely to get the sprocket you need. In addition, our machine shops can provide any modifications you might need in one stop.

Serving You Better.
